PIPELINE

PROJECT STAKEHOLDER MEETING INVITATION WHISTLER PIPELINE LLC WHISTLER Project

WHISTLER PIPELINE LLC is pursuing the construction of a new, underground, natural gas pipeline and associated facilities from Pecos County, Texas, to Nueces County, Texas (see WHISTLER Project Overview Map). As currently contemplated, the WHISTLER Project will consist of approximately 449.2 miles of new pipeline facilities, four (4) compressor stations, and approximately four (4) lateral pipelines. Ninety percent (90%) of the mainline pipeline facilities will be collocated with existing pipelines and other rights-of-way.

WHISTLER PIPELINE LLC invites all interested parties to attend Project Stakeholder Meetings regarding the WHISTLER Project. Three meetings will be held at the locations below on December 17th, 18th, and 19th. The Project Stakeholder Meetings are an informal opportunity for you to interact with WHISTLER project representatives about the project, ask questions, and provide feedback. Information will be available on topics such as project scope, location of facilities, construction, operation, schedules, land restoration, and safety.
